

Watch the video by Douglas Crockford on YouTube (about an hour long) at:

<https://www.youtube.com/watch?v=taaEzHI9xyY>

Write a 1000-word essay (about 2-3 pages doubled-spaced text) about the video which:

- 1) Answers the question, "Do you agree with Crockford's assessment of how programming uses both the head and the gut? Why or why not?"
- 2) Answers the question, "Which of the two brain systems do you feel most influences your understanding of the programming you have done so far?"
- 3) Discusses the statement, "Because the head does most of the 'deep thinking', it is more useful in programming practice than the gut."
- 4) Discusses the questions, "In your chosen major, which do you use more often, your head thinking or your gut thinking? Is this typical of that discipline? Why or why not?"
